## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement filed 17 June 2010 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered. The cited Japanese Office Action is not in the English language and therefore can not be considered by the examiner.

### ***Allowable Subject Matter***

2. Claims 1-8 are allowed.

#### **[claims 1-8]**

3. While it is known in the prior to attempt to avoid false recognition of sounds in voice recognition systems due to key presses, the specifics claimed in claims 1-8 are not taught or suggested by the prior art.

4. Claims 1-8 recite a number of units. While the specification describes the use of a program running on microcomputer (e.g. c. 8, l. 24 – c. 9, l. 3) it is believed that at least the claimed "sensor unit for detecting a sound" requires some hardware components capable of capturing sound and converting the sound into a format which could be processed by the remainder of the system. Therefore, claims 1-8 are not

found to be readable on a purely software implementation and do not encompass non-statutory subject matter.
